my quebec my doctor psychiatrist wont give me more than 40mg aderrall xr daily but it no longer do nothing and even with 80mg xr it is barely make effect. I saw many peoples in us been prescribed like 120mg xr and ir, but in quebec canada it look like they dont care about seing you suffer and undertreated and i would like to know what my option. Vyvanse and lower dont make nothing. My heart not even higher little bit on 80mg adderrall xr while 10 years ago 20mg xr was verry correct. I need some recommendation and what my option cuz i feel abandonned by medical system. My psychiatrist keep sayin for the last 2 years that 40mg xr is the max she can prescribe. But study shown that peoples undertreated most likely turn out to street drug doesnt? I need some response please help me im clearly a fast metabolizer with a tolerance. lets note that i already had a "psychose" 5 years ago, that the reason i have now psychiatrist follow up. in fact, i was, guess what, swallowing meth street pill, just to function on my daily task and at some point, there have a court action filled by my parents to send me in psychiatry against my will, and the psychiatrist i follow today had writed that it was a psychose, while these words was verry to much, i was on meth pill because i was neverwent to doctor to get diagnosed with adhd, so when i leaved this "against my will" hospital, first thing i did was adhd test from neuropsychologuem, which end up diagnosed me with adhd. while ive not touched any street drug nor had cravingfor it for the last 5 years, it been 2 years i ask forpsychiatrist to raise my dose since it no longer providen noething at all, and she alway say 40mg it the max, so im starting to think medical system abandonned me and dont giver a shit and seriouysly think about get back to street drug just to feel normal aand productive as my psychiatrist decided per her own judgement, without titration, capped at 40mgm, even i told her i can literally sleep without difficulty, even 1 h after having taken my meds, and nnever had loss of apetite. my heart bpm is totally normal at 80mg (thing that i cant mention to doctor and she will call me drug seeker and

abuser for taking 2 dose in a single day). im just totally about to give up everything. does she can act this way? it most.likely causing me more damage.an undertreatment
